

Triple Action Cartridge

Nano-Zinc Polypropylene filter for removal of sediment, sludge, chlorine, taste and odor

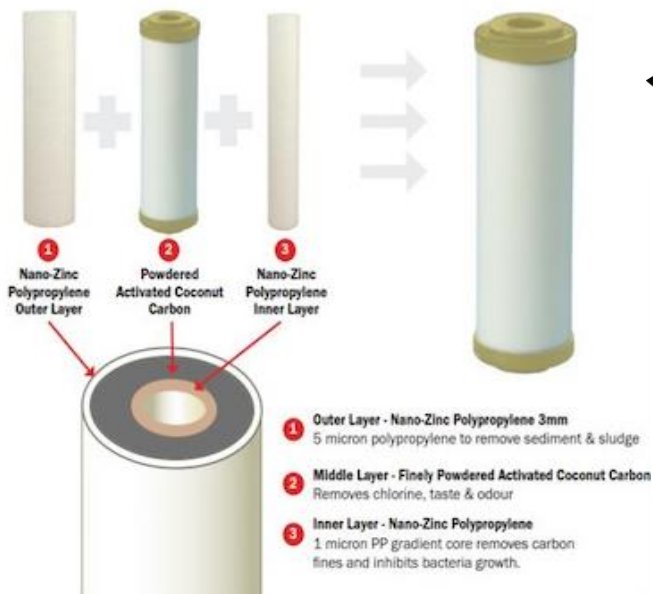

Dimensions	Description	Micron Rating (Nominal)	Flow Rate (LPM)
10" x 4.5"	Sand, silt, dirt and rust particles.	1	25
20" x 4.5"	Sand, silt, dirt and rust particles.	1	50

Features & Benefits

- High flow rate with low pressure drop
- High dirt holding capacity
- High chlorine removal rate
- NSF Coconut Shell Activated Carbon

Three Stage Filtration:

Outer Layer	Nano-Zinc Polypropylene Removes sediment & Sludge
Middle Layer	Granular Activated Coconut Carbon Removes chlorine, taste & odor
Inner Layer	Nano-Zinc Polypropylene Inhibits bacterial growth

Note:
Replace cartridge every 12 months
