

Nano-Silver Coconut Shell Activated Carbon Block

For Chlorine, Taste, Odor, VO's reduction: Bacteria Resistance plus of 99% anti-Bcateria effect

Dimensions	Description	Micron Rating (Nominal)	Flow Rate (LPM)
10" x 4.5"	Taste, Odor, Chlorine, and Cyst Reduction*	1	20
10" x 4.5"	Taste, Odor, and Chlorine	5	25
20" x 4.5"	Taste, Odor, Chlorine and Cyst Reduction*	1	40
20" x 4.5"	Taste, Odor, and Chlorine	5	48

Features & Benefits

This all new Silver Impregnated 100% Coconut Carbon is a Superior Carbon Block Filter.

This filter is impregnated with silver for the added benefits of carbon and the bacteriostatic properties of silver impregnation.

Whilst carbon effectively removes odors and taste issues from water, it will leave behind microscopic metal compounds in the form of minute ash/dust particles, which in turn prove to be a source of nourishment for bacteria. This bacteria feeds off the nutrients in the insoluble ash and can then be flushed into the drinking water supply.

Ideal for town water supplies and tank water. Use as a single filter or as the second stage in twin systems.

Recommended replacement 9 -12 months
